

THE WORLD HAS RECOGNISED OUR LACK OF CONTRIBUTION.

**DOW JONES SUSTAINABILITY INDEX 2017
RANKS AMBUJA AT NO.7 GLOBALLY.**

At Ambuja we have always looked to produce the strongest cement, with the lightest carbon footprint. And now we're recognised for it at a global platform – a DJSI ranking of No.7 in the Construction Material category. We're amongst the lowest carbon emissions generators in the industry, using 7.5 million tonnes of recyclable waste material. We treated over 50,000 tonnes of plastic that would've otherwise clogged our oceans. And 7.5% of our captive thermal power generation came through renewable sources. However, the one area we haven't cut back on, is water generation, becoming 5.5 times Water Positive. Sustainability has always been at the core of our business, and it's the 'I Can' spirit of our people that has helped raise standards for the cement industry at large. Speaking of improving standards, here are the results for the quarter and year ended December 31, 2017.

STANDALONE FINANCIAL RESULTS FOR QUARTER AND YEAR ENDED DECEMBER 31ST, 2017.

Particulars		Quarter Oct - Dec 2017	Quarter Oct - Dec 2016	Year Jan - Dec 2017	Year Jan - Dec 2016
